How likely are you to doze off or fall asleep in the following situations, in contrast to feeling just tired? This refers to your usual way of life in recent times. Even if you haven't done some of these things recently try to work out how they would have affected you.

Use the following scale to choose the **most appropriate number** for each situation:

0 = Would **never** doze

1 = **Slight chance** of dozing

2 = **Moderate chance** of dozing

3 = **High chance** of dozing

*It is important that you answer each question as best as you can.*
